Victory

Dear Hiring Committee,

I am writing to express my interest in the Chief Technology Officer position at Victory. With my extensive background in technology strategy and implementation, combined with leadership experience in guiding Fortune 500 executives on Generative AI solutions at IBM, I am excited about the opportunity to contribute to Victory's objectives.

In my current role as Senior Director of AI Strategy, I am responsible for advising clients on the deployment of enterprise-class technologies, including IBM Watson and Watsonx. This experience has honed my ability to communicate complex technical concepts to a diverse audience, ensuring stakeholders understand and leverage new technologies for competitive advantage. My strategic thinking is complemented by a solid foundation in business acumen, having routinely participated in budget planning and performance analysis to align technology initiatives with broader business goals.

My educational background includes a Master's degree in Education from Lamar University, which, coupled with a Google certification, has provided me with a unique perspective on the integration of technology in educational settings. This perspective guides my approach to developing quality assurance and data protection processes while ensuring the profitable usage of technology across departments.

I am particularly drawn to the responsibility of monitoring the system infrastructure at Victory to ensure functionality and efficiency. My problem-solving capabilities, along with my commitment to continuous improvement based on stakeholder feedback, will allow me to effectively adapt the technology strategy as needed.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the goals of Victory and how I can contribute to your esteemed team.
